Street Address: 338D Joyce Cummings Center
177 College Ave
Medford, MA 02155
Website: annahaensch.com

RESEARCH INTERESTS

Science and technology policy, especially the use of artificial intelligence in the public sector and critical infrastructure. Applications of data science, physics-informed mathematical modeling, agent-based modeling, statistical machine learning and artificial intelligence to human networks and complex and social systems. Translational methods focused on connecting data to policy, with an emphasis on sustainability, safety, and equity.

ACADEMIC & PROFESSIONAL APPOINTMENTS

United States Senate, Office of U.S. Senator Elizabeth Warren, Washington, DC
Legislative Fellow for Artificial Intelligence, September 2024 – present.

Tufts University, Medford, MA
Senior Data Scientist, Tufts Institute for AI (formerly Data Intensive Studies Center), January 2021 – present.
Secondary Appointment, Department of Mathematics, July 2021 – present.
Provost Lecturer, Fletcher Graduate School of Global Affairs, July 2021 – present.

Tagup Inc., Somerville, MA
Research Data Scientist, September 2019 – December 2020.

Duquesne University, Pittsburgh, PA
Associate Professor, Department of Mathematics & Computer Science, August 2020 – May 2021.
Assistant Professor, Department of Mathematics & Computer Science, August 2013 – August 2020.

Max Planck Institute for Mathematics, Bonn, Germany
Visiting Researcher, Jan. 2018 – May 2018; Jan. 2014 – May 2014.

National Public Radio, Washington, D.C.
AAAS-AMS Mass Media Fellow, May 2013 – Aug. 2013.

EDUCATION

Wesleyan University, Middletown, CT
Ph.D. Mathematics, May 2013.

State University of New York at New Paltz, New Paltz, NY
B.S. Mathematics, May 2007.

RECENT GRANT FUNDING

- (Under Review) PI, National Science Foundation Cyber-Physical Systems (NSF-CPS), *Cooperative In-Farm and Cross-Farm Transfer Learning for Offshore Wind Turbine Performance and Reliability*, \$1,200,000, with Northeastern PI E. Tronci and Co-PI B. Moaveni, (January 2025 – December 2027).

- (Awarded - Current) Co-PI, National Science Foundation Partnership for International Research and Education (NSF-PIRE), *Multi-Domain, Multi-Scale, Policy-Aware Digital Twin for Offshore Wind Energy Infrastructure*, \$1,498,144, with PI B. Moaveni, Co-PI U. Khan, and Co-PI H. Ebrahimian, (January 2023 – December 2025) Award OISE-2230630.
- (Awarded) Key Personnel, Department of Defense Small Business Innovation Research (DoD-SBIR), *LAV25 Logistics Optimization using Machine Learning*, \$1,593,070, with PI William Vega Brown, (May 2020 – November 2021) Award N68335-20-F-0459.
- (Awarded) PI, National Science Foundation Division of Mathematical Sciences (NSF-DMS), *Workshop on Automorphic Forms and Related Topics*, \$14,987, with Co-PIs Ben Kane, Djordje Milićević, and Howard Skogman, (March 2019 - February 2020) Award DMS-1854113.

PREPRINTS (* denotes papers where authors are ordered alphabetically)

1. **A. Haensch**, E. M. Tronci, A. Banerjee, V. Valencia, B. Moaveni. A Safety-Aware Framework for Offshore Wind Turbine Blade Maintenance, under review.
2. **A. Haensch**, C. Kelling. BlockR: An Areal Spatial Anonymization and Visualization Tool, under review.
3. **A. Haensch**, D. Deitsch. An Equity-Aware Recommender System for Curating Art Exhibits Based on Locally-Constrained Graph Matching, under review, up-to-date version on ArXiv arXiv:2207.14367.

PUBLICATIONS (* denotes papers where authors are ordered alphabetically)

SELECTED INVITED TALKS

- Plenary Speaker, *Becoming a Data Scientist: An Impractical Guide*, Math For All Conference, Tulane University, New Orleans, LA, April 2024.
- Invited Speaker, *Data Science for Police Accountability*, X-SIG Seminar Series, Gettysburg College, Gettysburg, PA, Feb. 2023.
- Featured Speaker, *From Riemann Zeta to Big Data: A journey through mathematics and the lessons learned along the way*, Graduate Research Opportunities for Women (GROW) 2022, Duke University, Durham, NC, Oct. 2022.
- Selected Speaker, *Python for Global Applications: Teaching scientific Python in context to law and diplomacy students*, SciPy: Scientific Computing with Python Conference, Austin, TX, July 2022.
- Featured Speaker, *An Equity-Aware Recommender System for Curating Art Exhibits Based on Locally-Constrained Graph Matching*, Data4Justice Conference, Institute for the Quantitative Study of Inclusion, Diversity & Equity, *virtual*, April 2022.
- Invited Speaker, *Southeastern-Massachusetts Quantitative Engagement and Literacy Conference*, Bridgewater State University, Bridgewater, MA, Feb. 2022.
- Plenary Speaker, *Some results on class numbers for quadratic forms*, Upstate Number Theory Conference, University of Buffalo, Buffalo, NY, April 2018.
- Invited Speaker, *Quadratic forms and the representation problem*, Oberseminar, Max Planck Institute for Mathematics, Bonn, Germany, March, 2018.

PEDAGOGICAL INTERESTS

My approach to teaching data science is grounded in practical and applied data science with an emphasis on the social and ethical considerations of new technology. Seating the technical aspects of data science in surrounding literature from the social sciences and current events is a critical cornerstone of my courses. I've taught various level courses to students from the humanities and the sciences using both R and Python. I've advised undergraduate and graduate researchers in projects involving data mining, web scraping, optical character recognition, visualization, analysis, and algorithm programming and optimization.

TEACHING EXPERIENCE

Selected Courses Taught (*100 level are advanced undergraduate courses, 200 level are graduate courses*)

- *Data Science and AI Policy* - A foundational course focused on the full data life-cycle including the generation, collection, processing, analysis, and management of data. The course also presents recent advances in artificial intelligence and the opportunities and threats that these pose as well as related legislative actions. *GMA-D258 at Tufts University*

- *Data Science Practice for Law and Diplomacy* - A foundational course in data science covering data exploration, data visualization, and data modeling. Coding is carried out in Python and the technical work is backed by readings on the social, political, and global impacts of big data. *DHP-D258 at Tufts University*
- *Mathematical Models in Social Context* - A survey course focused on Science, Technology & Society literature on models and algorithms. The course addresses concepts like model selection and impact, ethical breakdowns in big data and algorithms, and knowledge in the context of big data. *STS-10 at Tufts University*
- *Foundations of Data Analysis in R* - A beginner technical course establishing a unifying framework for how data should be used to answer and explore different questions. The course provides an introduction into the ways that data are used and analyzed across the different disciplines within the arts, humanities, and sciences using popular R libraries. *DATA-200 at Tufts University*
- *Mathematical Aspects of Data Analysis in Python* - A technical course in mathematical data science with an emphasis on theory, covering topics like PCA, clustering and density methods, neural networks and spectra graph theory. The course will also highlight important applications and students will have the opportunity to program some standard algorithms and use explore existing Python libraries. *MATH-123 at Tufts University*.
- Occasional short workshops: *Data Visualization with Python*, *How to Set up a Local Computing Environment*, *How to work with an API*, and others.

Students Advised & Mentored

- Aidan Banerjee, Undergraduate Research Assistant, Jan. 2024 – present.
- Bridget Moynihan, Graduate Research Assistant, May 2022 – present.
- Mackenzie McPike, Graduate Research Assistant, Sept. 2023 – Dec. 2023.
- Rosie Rong, Graduate Research Assistant, May 2022 – May 2023.
- Isabel Ljungberg, Master's Thesis Advisor, degree completed Dec. 2021.
- Tyler Gaona, Undergraduate Research Assistant, Sept. 2015 – May 2017.
- C. Thomas Dean, Undergraduate Research Assistant, Sept. 2014 – Dec 2014.

SELECTED PROFESSIONAL SERVICE

Editorial & Review

- Guest Editor, The American Mathematical Monthly, Special Issue on Data Science, 2025.
- Proposal Review Panelist, National Science Foundation, 2022, 2023.
- External Reviewer, Quantitative Analysis Center, Wesleyan University, 2022.

Conferences & Panels

- Program Chair, SciPy: Scientific Computing with Python Conference, Tacoma, WA, 2024.
- Facilitator and Panelist, AI, Design and Afro-Nowism, Tufts University, Medford, MA, 2024 (with D.Martinez).
- Track Chair for Digital Humanities, SciPy: Scientific Computing with Python Conference, Austin, TX, 2023.
- Organizer, AMS Spring Sectional Meeting - Special Session on Mathematics of Data Science, Tufts University, Medford, MA, 2022 (with A. Tasissa, J. Murphy, A. Patra, and V. Maroulas).

- Organizer, Art Datathon, Tufts University, Medford, MA 2024 (with D. Deitsch).
- Organizer and Moderator, A Conversation with the New York Times, Tufts University, Medford, MA 2021.
- Organizer, 33rd Automorphic Forms Workshop, with funding from the National Science Foundation Award DMS-1854113, Duquesne University, Pittsburgh, PA, 2019 (with B. Kane, D. Milićević, and H. Skogman).
- Organizer, Sage Days 90: Women in Sage, with funding from Microsoft Research and the Beatrice YorkmarkFoundation, Harvey Mudd College, Claremont, CA, 2017 (with A. Deines, B. Thompson, U. Whitcher).

MEDIA OUTREACH

- Moderator, *A Conversation with the New York Times*, Tufts University, Medford, MA, Sept. 2021.
- Guest, *As It Happens*, CBC Radio One, June 2017.
- Guest, *Press Play with Madeleine Brand*, KCRW the NPR station out of Santa Monica, CA, March 2017.
- Guest, *Essential Pittsburgh*, WESA Pittsburgh's NPR News Station, May 2016.
- Podcast Co-Host, *The Other Half*, a podcast about math, available on iTunes, May 2015-May 2016.
- Editor/Contributor, AMS Blog on Math Blogs, Feb. 2015– Aug. 2019.
